Transition phenomena at saturation temperature—Conductance study of alkali halides in formamide in the presence of non-electrolytes 220

Yajnik, Smt. S A
Polarography of indium in thioglycollic and ascorbic acid media 143

SUBJECT INDEX

3-acetyl-4-hydroxycoumarins
A convenient one-step synthesis of 3-acetyl-4-hydroxycoumarins 118

Arithmetic sequences
Sets generated by arithmetic sequences 245

Central limit theorem
A central limit theorem for independent summands 43

C-glycosylisoflavanone
Dalpanin, a *C*-glycosylisoflavanone from *Dalbergia paniculata* 23

Charged body
Escape of photons from charged bodies 9

CNDO calculation
Halogen substituted amides—I 256

Conductivity of alkali halides
Transition phenomena at saturation temperature—Conductance study of alkali halides in formamide in the presence of nonelectrolytes 22(

Cosmic rays
Analysis of cosmic ray spectrometer data by the method of least squares and m.d.m. of the spectrograph 204

Direction of enolization
Direction of enolization of 1 : 3-diketones by mass spectrometry 262

Elastico-viscous fluid
Laminar boundary layer over a flexible surface in oscillatory flow—Part II 179

Exact computation
Finite segment *p*-adic number systems with applications to exact computation 58

Equatorial electrojet currents
On the simultaneous existence of eastward and westward flowing equatorial electrojet currents 80

Fluid flow
Free convection flow of an elastico-viscous liquid through a vertical circular cylinder 99

Laminar boundary layer over a flexible surface in oscillatory flow—Part I 164

Laminar boundary layer over a flexible surface in oscillatory flow—Part II 179

Peristaltic motion of a micropolar fluid 149

Unsteady flow past a flat plate with suction 215

Furanobenzopyrones
Synthesis of phenyl substituted furanobenzopyrones 38

Geomagnetic *Dst*
Relationship between solar magnetic sector structure and geomagnetic *Dst* 233

Heterocyclic rings containing nitrogen
Studies in the formation of heterocyclic rings containing nitrogen—Part XXI 124
Studies in the formation of heterocyclic rings containing nitrogen—Part XXII 132

Hydrogeology
Evaluation of the aquifer characteristics of the basaltic terrain of Maharashtra in India 108

Maximum detectable momentum
Analysis of cosmic ray spectrometer data by the method of least squares and m.d.m. of the spectrograph 204

Meteorites
Concerning mercury in meteorites 137

Newtonian fluid
Laminar boundary layer over a flexible surface in oscillatory flow—Part II 179

Oxidation of thiohydantoin and rhodanine
Kinetics of oxidation of thiohydantoin and rhodanine with vanadium (V) 15

p-adic number system
Finite segment *p*-adic number systems with applications to exact computation 58

Palladium (II)
Amperometric determination of palladium 32

Photons
Escape of photons from charged bodies 9

Physiologically active compounds, search for 197

Polarography
Polarography of bismuth in malonic and chloracetic acid media 93
Polarography of indium in thioglycollic and ascorbic acid media 143

Reynolds number
Peristaltic motion of a micropolar fluid 149

Riemannian manifold
Generalised (f, g, u, v, λ)-structure 1

Saturation temperature
Transition phenomena at saturation temperature—Conductance study of alkali halides in formamide in the presence of nonelectrolytes 220

Solar magnetic sector structure
Relationship between solar magnetic sector structure and geomagnetic *Dst* 233

Transition phenomena
